

Disposal Guidelines for Turntide Motors and Motor Controllers

This document contains disposal guidelines that ensure end-of-life Turntide equipment is disposed of in an environmentally responsible manner. At Turntide, our mission is to make every watt worthwhile for humanity to preserve our planet for future generations. As a manufacturer of optimal efficiency motor systems, we are proactive in adapting sustainable, eco-friendly business practices as we refresh our products.

Motor Controllers

The following guidelines apply to these families of motor controllers:

- P04
- P05/P05SL
- P06
- SL120
- SL121

Motors

The following guidelines apply to these motors:

- V01
- V02
- V03
- TX

Disposal Guidelines

Follow these instructions to dispose of the motor controllers and motors.

1. **On motor controllers ONLY:** Drill a hole through all key integrated circuits.
2. Deliver the motor controller or motor to a qualified local e-waste management facility to be recycled or destroyed.
